## 1. Voorzorgsmaatregelen en aanvullende informatie

- ① De verlichting moet qua specificaties overeenkomen met de driver (Inputvoltage AC220-240V 50/60Hz).
- ② De verlichting moet geïnstalleerd worden door een professionele elektricien.
- ③ Test vóór installatie de verlichting zodat u zeker weet dat deze werkt. Wanneer u deze getest heeft dient u de stroom van de verlichting af te halen om een elektrische schok te voorkomen.
- ④ Volg alle installatiestappen (weergegeven aan de rechterkant) om de verlichting op te juiste manier te installeren. Nadat de installatie is voltooid kunt u weer stroom op de verlichting zetten en deze aanzetten.
- ⑤ De IP-waarde van deze hanglamp is IP20. Deze is dus niet bestand tegen nevel en water. Deze hanglamp mag daarom alleen gebruikt worden binnenshuis in een droge en geventileerde ruimte.
- ⑥ Wanneer u de buitenkant van de hanglamp wilt schoonmaken doe dit dan alleen met een vochtige doek. De binnenkant van de hanglamp mag alleen met een droge doek afgestoft worden. Raak hierbij de LED verlichting zelf NIET aan!

## 2. Inhoud

- ① Hanglamp

- ② Driver

Driverbox met 1.5 m bedrading: 1 PC
